## WORK FOR WEBSITE DEVELOPERS (Yahia,Harvey,Kyucore,Afnan,Javier,Ghadeer)

Homepage:

- Animation with our logo (animation swipe from the bottom to the centre)
- button under the logo that sent to Programming language selection page

Second page (Programming language selection page):

- Logo and company name in the top-left of the page , in the right-top of the page we need a menu bar that contains link to return to home-page
  - The body of page should contains logos and names of the most important programming languages and every logo should sends to other Pages related to the programming language

Other pages (Pages of every single programming language)

- We will decide it after the realization of the first 2 pages

## WORK FOR ANDROID/IOS DEVELOPERS(Yahia,Shubham,Fatima,Afnan,Javier,Aditya FOR ANDROID , FOR IOS: Chris)

- An app with the home-page like website home-page (Animation with our logo (animation swipe from the bottom to the centre,button under the logo that sent to Programming language selection page)
  - In the home page we need a bar in the top-right with a menu with all

## WORK FOR PC SOFTWARE DEVELOPERS(Afnan,Yahia,Javier,Arpit)

- Software with all website feature

The work will be most in the website, because apps and pc software will be very similar to the website

Graphic design (Wassim)

-No words needed, first project is awesome!

Thanks to all team member for the collaboration! YOU ARE THE BEST!
